

Objectives of this module:

- Define the lab configuration for Ansible 101 (Ansible Training)
-

The lab environment should consist of the following:

- 1 x Ansible Command Server (ACS)
 - 1vCPU, 256MB RAM, 10GB Disk
 - install tree, openssh-server
- 1 x Development Web/App server (dev01)
 - 1vCPU, 256MB RAM, 10GB Disk
 - install openssh-server
- 2 x Production Web Servers (web01/web02)
 - 1vCPU, 256MB RAM, 10GB Disk
 - install openssh-server
- 1 x Production Database Servers (db01)
 - 1vCPU, 256MB RAM, 10GB Disk
 - install openssh-server
- 1 x Production Load Balancer (lb01)
 - 1vCPU, 256MB RAM, 10GB Disk
 - install openssh-server

Total size: 6vCPUs, 1.5GB RAM, 60GB Storage)

User information:

```
username: ansible
password: ansible
ansible is a sudo user
```

Network

```
All require access to a apt-get repo (Internet or otherwise)
All can be in the same subnet (10.15.1.0/24)
```
